- SPANISH: NATIVE

ABOUT ME

As a full stack web developer, my biggest motivation is to create innovative technological solutions that improve people's lives. With one year of experience at Reachout, I have collaborated on full stack projects and developed my front-end development skills. Additionally, thanks to my training in industrial design, I have a unique perspective to tackle the challenges of technology and design. If chosen, you can expect a creative and results-oriented approach to any project I tackle.
